Summary

I am a Frontend developer with over 1 year of experience working with technologies like **React**, **TypeScript**, **Tailwind**, **Zustand**, and **Trello APIs**. I have built clean, responsive user interfaces and integrated real-world APIs into my projects. I'm a quick learner who enjoys writing efficient and maintainable code.

Experience

IT TIME ACADEMY

Personal Project Apr 2025

- Developed a fully responsive web application using **React**, **JavaScript**, and **Tailwind CSS**, with a modern and clean user interface. Integrated the site with **Telegram Bot API** to send real-time form submission messages directly to Telegram. Implemented **multilingual support** using **i18next**, enabling seamless switching between **English**, **Russian**, **Uzbek Cyrillic**, and **Uzbek Latin**. Enhanced the visual appeal by adding animated backgrounds with **Particles.js**. Focused on clean code architecture, reusable components, and localization best practices.

Sleep Nest

Personal Project fev 2025

- Built a modern, responsive landing page using **React**, **JavaScript**, and **Tailwind CSS**. Added a **search** system for quick product lookup and managed local product data without external APIs. Implemented a like feature with **Zustand**, storing data in **localStorage** for persistence. Integrated a **Telegram Bot API** contact form for real-time messaging. Focused on reusable components, performance, and cross-device compatibility.

Admin Panel for Aoron Site

Personal Project march 2025

- Developed an admin panel using **React** with a focus on structured and intuitive UI. Performed full CRUD operations (**GET**, **POST**, **PATCH**, **DELETE**) using both **Axios** and **Fetch**. Worked with **REST APIs** documented in **Swagger** and tested endpoints via **Postman**. Designed for efficient content management and ease of use.

Projects

Sleep Nest [Live demo](#) [Github](#)

Responsive landing page built with **React**, **Zustand**, and **Tailwind CSS**. Includes product search, like system with **localStorage**, and **Telegram Bot** integration.

IT Academy [Live demo](#) [Github](#)

Multilingual website using **React**, **TypeScript**, **Tailwind CSS**, **i18next**, and **Particles.js**. Supports 4 languages and real-time form submission via **Telegram Bot**.

Admin Panel (Aoron Site) [Live demo](#) [Github](#)

Built with **React**, **Axios**, and **Fetch** for API-based **CRUD** operations. Tested endpoints using **Swagger** and **Postman**. Designed for content management.

Skills

Technical Skills: **HTML5**, **CSS3**, **JavaScript (ES6+)**, **TypeScript**, **React**, **Next.js**, **Redux**, **Zustand**, **Bootstrap**, **Tailwind CSS**, **Sass/SCSS**, **Material UI**, **Framer Motion**, **Axios**, **Fetch**, **Postman**, **Swagger**, **React-i18n**, **GitHub**, **Vercel**, **Netlify**, **Responsive Design**.
