Summary

I am a Frontend developer with over **1 year of experience** working with technologies like **React**, **TypeScript**, **Tailwind**, **Zustand**, and **Trello APIs**. I have built clean, responsive user interfaces and integrated real-world APIs into my projects. I'm a quick learner who enjoys writing efficient and maintainable code.

Experience

IT Time Academy

August 2024 – Present

Frontend Developer

Tashkent — Full-time

- Developed and maintained responsive, high-performance web applications using React.js, Tailwind CSS, and modern JavaScript (ES6+), ensuring full cross-browser and mobile compatibility.
- Integrated dynamic data from RESTful APIs, applied efficient state management using Zustand and React Context, and collaborated with UI/UX teams to deliver clean, accessible interfaces with real-time interactivity.
- Led the frontend development of educational platforms and admin dashboards, implemented reusable components, participated in Agile workflows using Git, and supported junior developers through code reviews and mentorship.
- Developed a fully responsive web application using React, JavaScript, and Tailwind CSS, with a modern and clean user interface. Integrated the site with Telegram Bot API to send real-time form submission messages directly to Telegram. Implemented multilingual support using i18next. Enhanced the visual appeal by adding animated backgrounds with Particles.js. Focused on clean code architecture, reusable components, and localization best practices.

Projects

Sleep Nest [Live demo](#) [Github](#)

Developed a fully responsive landing page with React, Zustand, and Tailwind CSS, incorporating a dynamic product search functionality, a persistent like system using localStorage, and Telegram Bot integration to handle real-time user interactions and push notifications. The page is optimized for mobile and desktop devices, ensuring smooth performance and a seamless user experience.

IT Academy [Live demo](#) [Github](#)

Created a multilingual website using React, TypeScript, and Tailwind CSS, integrating i18next for localization and Particles.js for interactive backgrounds. Implemented real-time form submission via Telegram Bot, optimizing performance for responsiveness and cross-browser compatibility. Designed the website with a mobile-first approach, ensuring smooth user experience across various devices and languages.

Admin Panel (Aoron Site) [Live demo](#) [Github](#)

Developed a content management system using React, Axios, and Fetch for implementing API-driven CRUD operations. Conducted extensive endpoint testing and validation with Swagger and Postman, ensuring smooth and reliable integration with backend services. Designed the system to streamline content creation, editing, and management, offering an intuitive and user-friendly interface for both administrators and end-users.

Skills

Technical Skills: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Redux, Zustand, Bootstrap, Sass/SCSS, Material UI, Framer Motion, Axios, Fetch, Postman, Swagger, React-i18n, GitHub, Vercel, Netlify, Responsive Design.
